

MAK
DESIGN & PASSION

2025
collection

THE COMPANY

MAK S.p.A., manufacturer of alloy wheels since 1991, represents today an established brand, recognized among the major leaders in the sector both on the national and on the international scene, with a turnover of around 60 million euros and a production of 400,000 wheels per year. The main elements of MAK's success are the high quality standards, the wide variety of the product range, the speed in responding to the market needs and the high flexibility in planning and customizing orders. Thanks to a fully stocked warehouse, with more than 120.000 wheels and about 4.000 items, MAK quickly reaches the customer through fast deliveries all over the world.

In 2024, our company went through a major **Reshoring** process, which is the complete return of the alloy wheel production process to Italy. The **Back-to-Italy** process comes on the heels of a series of investments in the production plants to expand and install new robotic islands at the foundry and to build from scratch a building that houses a **Painting Plant**, according to **Industry 4.0** parameters capable of guaranteeing the same quality of finish as the first plant. The efforts undertaken made possible to increase the production capacity by 20%, helping to bring back the productions back home.

Made in Italy Passion, Design and Quality distinguish the company, which is finding growing acceptance especially in the segment of medium-high range cars.

MAK S.p.A. headquarter and warehouse in Carpenedolo / MAK S.p.A sede centrale e magazzino Carpenedolo

MAK S.p.A. production plant in Carpenedolo / MAK S.p.A sede produttiva Carpenedolo

MAK S.p.A. production plant in Gussago / MAK S.p.A sede produttiva Gussago

MAK S.p.A., azienda produttrice di ruote in lega nata nel 1991, rappresenta oggi un marchio affermato riconosciuto tra i maggiori leader del settore tanto nel panorama nazionale quanto in quello internazionale, con un fatturato di circa 60 milioni di euro e una produzione di 400.000 ruote l'anno. Gli elementi principali del successo di MAK sono gli elevati standard di qualità, l'ampia varietà della gamma prodotti, la velocità nel rispondere alle esigenze del mercato e l'elevata flessibilità nella pianificazione e personalizzazione degli ordini. Grazie a un magazzino sempre fornito, con più di 120.000 ruote e circa 4.000 articoli, MAK raggiunge velocemente il cliente attraverso consegne rapide in ogni parte del mondo.

L'azienda ha affrontato nel corso del 2024 un importante processo di **Reshoring**, ovvero il completo ritorno del processo di produzione delle ruote in lega in Italia. Il **Back-to-Italy** si accoda a una serie di investimenti negli stabilimenti produttivi per ampliare e installare nuove isole robotizzate presso la fonderia e per costruire ex-novo un immobile che ospita un impianto di **Verniciatura** secondo i parametri di **Industria 4.0** in grado di garantire la medesima qualità della finitura del primo impianto. Gli sforzi intrapresi hanno reso possibile un aumento di capacità produttiva del 20% contribuendo al rientro in patria delle produzioni.

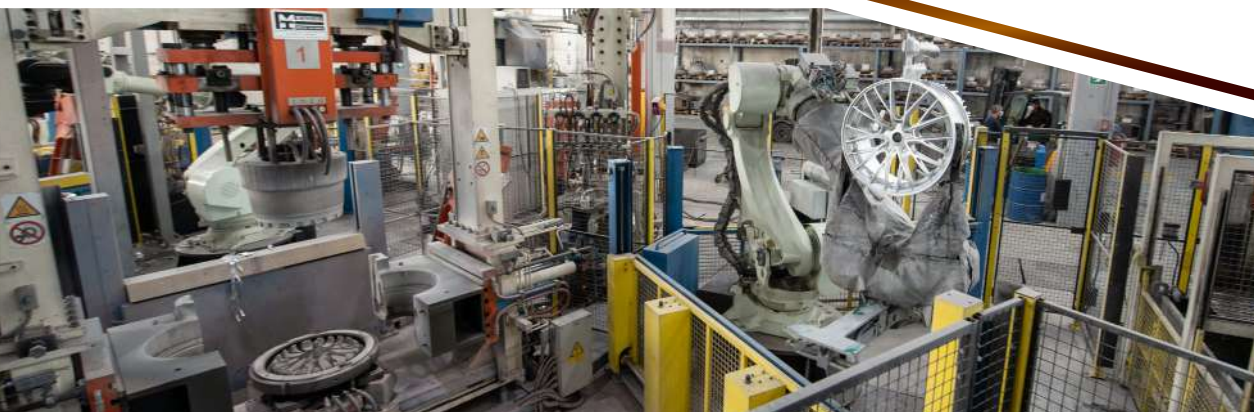

Passione, Qualità e Design Made in Italy contraddistinguono l'azienda, che trova un crescente consenso soprattutto nel segmento delle vetture di fascia medio-alta.

Central Warehouse / Magazzino Centrale

Painting Plant 4.0 / Impianto di Verniciatura 4.0

Automated Foundry / Fonderia Automatizzata

HOMOLOGATIONS

All **MAK** wheels are homologated according to each country regulations. MAK range is always up-to-date thanks to a constant and strong effort during the homologation process, test and quality check. Along with each wheel MAK provides the required homologation paper, granting the conformity of the wheels mounted on your car.

MAK laboratory achieved the **VIA certification and accreditation from the Ministry of Infrastructure and Transport** to proceed with the required tests for the approval of its products. Companies are awarded with these certifications only after a careful scrutiny by the competent authorities, who recognized MAK the necessary quality to test their products.

OMOLOGAZIONI

Tutte le ruote **MAK** sono omologate secondo le normative vigenti nei vari paesi del mondo. Un costante e intenso impegno nelle fasi di omologazione, di test e di controllo qualità, permette alla gamma MAK di essere sempre aggiornata. Ogni ruota è corredata dalla necessaria documentazione che garantisce la regolarità del prodotto montato sulla vostra auto.

Il laboratorio **MAK** ha conseguito la **certificazione VIA e l'accreditamento dal Ministero delle Infrastrutture e dei Trasporti** per lo svolgimento dei test necessari all'omologazione dei propri prodotti. Queste certificazioni vengono attribuite solo dopo una scrupolosa verifica da parte degli enti competenti, che ne riconoscono la qualità necessaria e idonea a testare i propri prodotti.

MAK PERFECT MATCH POLICY

With a view to perfectly matching the entire wheel system, MAK proposes its **PERFECT MATCH POLICY**: the perfect combination of the shades of all elements for a coordinated, attractive result in line with the high quality of MAK products.

MAK always suggests the correct colour matching of accessories such as **nuts and bolts, hub CAPS and TPMS valve** already on the **B2B platform**, in the certainty that the ensemble obtained from this combination of products will give the alloy wheel an **optimal aesthetic result**.

Attention to details makes the difference between a standard product and a **Premium** one: MAK's **PERFECT MATCH POLICY** is undoubtedly one of the aspects that **elevates and distinguishes the brand**, with a view to providing a proposal that is always more appropriate and appreciable by customers and end customers.

Example of incorrect colour matching of the entire wheel system
Esempio di errato abbinamento cromatico di tutto il sistema ruota

Nell'ottica di perfetto abbinamento di tutto il sistema ruota, MAK propone la propria **PERFECT MATCH POLICY**: la perfetta combinazione delle tonalità di tutti gli elementi per un risultato coordinato, accattivante e in linea con l'elevata qualità dei prodotti MAK.

MAK suggerisce sempre il corretto accoppiamento cromatico degli accessori quali **CAP coprimozzo, valvola TPMS e bulloneria** già all'interno della **piattaforma B2B**, nella certezza che l'insieme ottenuto da questa combinazione di prodotti conferisca alla ruota in lega un **risultato estetico ottimale**.

L'**attenzione per i dettagli** fa la differenza tra un prodotto standard e uno **Premium**: la **PERFECT MATCH POLICY** di MAK è senza dubbio uno degli aspetti che **innalza e distingue il marchio**, nell'ottica di fornire una proposta sempre più azzeccata e apprezzabile dalla committenza e dalla clientela finale.
